## **7. Payment terms**

The Client replenishes their Project's account, thereby forming a Deposit. The Deposit in the account is used to pay for the Services the Client orders through the Control Panel.

When the Client adds payment information to their Account, this information is sent to a third-party payment processor via a secure connection.

Services are provided only when there is a positive Balance in the Project's account, sufficient to cover the cost of the corresponding Service. The Company has the right to immediately suspend the provision of Services if a negative or zero Balance occurs in the Project's account.

Replenishment of the Project's account can be done using one of the following methods:

- Using bank payment cards in the Control Panel;
- By invoice with a unique number generated in the Control Panel. The invoice with a unique number can only be paid by the Client once;
- Any other method provided in the tools of the Control Panel.

The payment order must originate from the Client and include their identification details. In the absence of such information, the Company has the right to withhold the funds and suspend the provision of Services until the payment order is properly completed by the Client. The Client is responsible for covering the bank commission fees for transferring funds. If the payment is made by a third party on behalf of the Client, the Company has the right to suspend the deposit of funds and request the Client's confirmation for the payment or refuse to accept the corresponding payment.

The Client is responsible for the accuracy of the payments they make. In the event of a change in the Company's bank details, the Client is solely responsible for payments made using outdated details from the moment the valid details are published on the Company's Website.

The basis for the deduction of the Deposit from the Project's account is the data on the volume of Services consumed by the Client.

Information about the amount of charges for Services in the current month, received in the billing system at the time of the request, can be obtained by the Client using the tools of the Control Panel and other methods provided by the Company.

The Company, at its discretion, may provide the Client with Services through the "promised payment" function, after which Bonuses will be credited to the Client's account in an amount sufficient to cover the Client's Services within the next 72 (seventy-two) hours from the moment of activation of the Services. In this case, the Client undertakes to replenish the Project's account within 72 (seventy-two) hours from the activation of the "promised payment" function. After 72 (seventy-two) hours from the activation of the "promised payment" function, the Bonuses credited under this function will be deducted from the Project's account.

The Client is obligated to pay the Company all costs incurred by the Company in exercising any of its rights under the Agreement and/or applicable law regarding the collection of outstanding payments, including attorney fees, court costs, and collection agency fees.

Notwithstanding anything to the contrary, any non-payment by the Client constitutes a material breach of this Agreement. The Company will not provide Services to the Client until any outstanding or unpaid amounts are fully paid.

You remain a Client of the Company as long as the Balance remains positive and the Account and its contents have not been deleted or blocked.

## **8. Refunds**

A full refund of the Deposit from the Project's account is possible only if there are no active Services. To request a refund, the Client must submit a request to technical support. Please note: when requesting a partial or full refund from the account, all Bonuses available to the Client will be annulled.

Only the Deposit itself is eligible for a refund. Funds spent on Services are non-refundable. Bonuses credited to the Project's account as part of special promotions and bonus programs are non-refundable and can only be used to pay for Services under this Agreement.

The refund is made only to the payment method and in the manner used to replenish the account.

When refunding the Deposit, the fees charged by the payment system are the responsibility of the Client. The commission amount will be automatically deducted by the Company from the amount to be refunded.

Before processing the refund, the Company may require the Client to confirm the information provided during registration (such as requesting passport details, a copy of the passport, information about the Client's place of residence registration, or other documents verifying the identity). If the Client is unable to confirm the provided information, the Company may refuse to refund the remaining funds in the Project's account. The transfer of unused funds will be carried out exclusively through non-cash payments.

A refund of the remaining Deposit balance will not be made if the Client has been blocked for any of the reasons specified in the sections "Suspension of Agreement" and "Security" of this Agreement, or if the Client has violated other terms of this Agreement, the legislation of the Republic of Uzbekistan, or the laws of the Client's country of residence.

## **9. Deposit Deduction Policy**
